IN CONJUNCTION WITH:

Media Release 8 October 2024

'Safe & Effective' Roadshow a one day event supporting those with Vaccine Injury.

A Quest for Common Sense, Compassion & Justice

Searching for truth, impacts & solutions around the outcome of New Zealand's COVID Response.

Despite the desire of many to return to normalcy after the tumultuous past four years, the stark truth in New Zealand is that many individuals find themselves unable to resume their usual lives and work. For them, COVID-19 is far from over; its repercussions are just beginning, altering their lives in unforeseen and permanent ways.

Increasing evidence suggests that the mRNA vaccine is linked to a rising number of individuals experiencing severe and persistent symptoms.

More serious side-effects after the initial vaccine and boosters include **shortness of breath, heart palpitations, myocarditis, pericarditis, brain fog, muscle fatigue, joint pain, extreme debilitating exhaustion, recurring viral illnesses, paralysis and more.**

The COVID-19 vaccine has also been linked to the many 'sudden deaths' we are seeing reported in the media over the past couple of years.

Paradoxically, when visiting their doctor, these people are often being told there is nothing wrong with them, some even being diagnosed with 'vaccine anxiety' and told to see a psychiatrist.

This leaves them distraught and confused, not knowing where to turn for help.

It seems the government and many medical centres are turning a blind eye.

Yes, we know, this information is not palatable to hear. We'd all much rather bury our heads in the sand and get on with life. But we cannot.

Once you've heard a first-hand account from a vax injured person, and how their life has been irrevocably changed, or destroyed, you can no longer ignore what is happening.

- For example, [Gary Moller](#), a forensic health expert and one of the speakers at the Roadshow, will outline cases of people with serious complications, some serious enough to be near-death experiences.
- [Peter-Ray](#) of Queenstown, a former fire-fighter and apnea depth-diving expert, found himself hardly able to walk up a slight incline, necessitating several emergency hospital visits for his heartbeat irregularities and neurological symptoms.
- [Barry Duffield](#), the hulking actor known for his roles in 'Spartacus', Young Hercules and Xena: Warrior Princess, reduced to a weak wreck in his hospital bed post-vaccine, who will share his 'safe and effective' vaccine story at the Roadshow.

'SAFE & EFFECTIVE' ROADSHOW 2024

FOR CONFERENCE DATES & VENUE VISIT:
www.roadshow24.nz

IN CONJUNCTION WITH:

- [Heiko](#), a former elite triathlete in Norway, shared how he went from winning medals at extreme sports events to hardly able to walk down the stairs.

And [thousands of more stories](#) like this around New Zealand.

So you see, this issue is a local and worldwide problem.

Recent NZ ACC statistics also tell a story:

- ACC vaccine related injury claims totalled \$146,449 in 2018, \$145,875 in 2019, and leaped to a staggering \$4.5 million (\$4,551,458) in 2023.
- Since it's exceptionally difficult to have a C19 vaccine claim accepted by ACC, with many hoops to jump through, this may be just the tip of the iceberg.

The dam is breaking.

Is it time to admit this novel mRNA technology is not as 'safe and effective' as the New Zealand public were promised?

To address this critical issue, a number of brave and concerned doctors, health professionals and citizens, including vaccine-harmed, are coming together around New Zealand this November to bring *clarity, support and solutions*.

The theme of the '[Safe and Effective' Roadshow](#) is *A Quest for Common Sense, Compassion & Justice ~ Searching for truth, impacts & solutions around the New Zealand COVID Response*.

The four full-day events are being held in Dunedin, Queenstown, Nelson and Wellington between 9-15 November 2024.

You can find details of the 'Safe & Effective' roadshow at <https://www.roadshow24.nz/>

You can check more vaccine injury truth bombs at: <https://www.roadshow24.nz/resources.html>

You can download the media pack at: <https://www.roadshow24.nz/media-pack.html>

And you are welcome to reach out to the event management team at:
