IN CONJUNCTION WITH:

Media Release 16 October 2024

This November super-spunk Spartacus Xena Warrior Princess actor [Barry Duffield](#) will be in Queenstown.

Will he be promoting his next film?

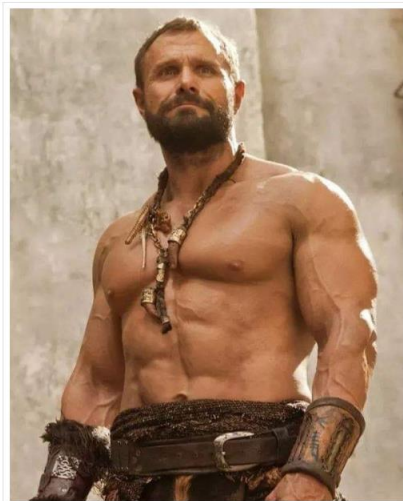

We're unsure, but one thing he will be talking about is how and why he recently tried TO TAKE HIS OWN LIFE.

Listen in to this recent radio interview(below) when he shares:

- What actually happens when you have a vax injury?
- Why did he initially think his symptoms 'were all in his head'?
- Why did doctor ridicule him down when he questioned if it might connected with the jab?
- Why was it so bad he tried to TAKE HIS OWN LIFE?
- Is it true tens of thousands of New Zealanders are also suffering in this way? ([The Health Forum think so](#) and so do many [doctors](#)).

Heart palpitations, uncontrollable tremors, inability to get out of bed... in his words his symptoms were 'horrendous'.

A compelling and sad story from former super-hunk Spartacus and Xena Warrior Princess actor Barry Duffield.

Barry's story starts around 18 mins:

"It was an unwritten rule you couldn't attribute anything to the vaccine when diagnosing people with post-vaccine symptoms" Dr Alison Goodwin adds on the interview

A listener to the show commented "I collapsed 30+ times with heart issues since 2nd vax. I ended up in an ambulance this year. Paid to see a cardiologist and told him this is because of the vax he got really angry at me and told me to "get over it" . I cried with frustration"
